

# Drinking Water Distribution Solution

# Transform How You Deliver Drinking Water.

As customer expectations evolve and competitive pressure rises, water distribution businesses are being called to deliver more volume faster and with greater accountability. Yet many still rely on highly fragmented systems and disjointed workflows—whether it is manually tracking coupon redemptions, maintaining asset records in silos, or, worse, scribbling out delivery routes each morning. These gaps limit visibility, introduce inefficiencies, and make it extremely difficult to scale.

What ambitious businesses need, in the current market climate, is a unified, innovative and data-driven ecosystem that streamlines operations from warehouse to doorstep—one that can plan daily deliveries, allocate routes intelligently, track asset movement, and verify coupon redemptions in real time.

AdIER's Drinking Water Distribution Solution, with its dedicated app, AQUAMOB, offers a full-spectrum water distribution management solution, purpose-built for the bottled water industry. Whether serving residential customers or large enterprise clients, it centralizes your core operations, from route planning, asset management, coupon tracking, to delivery reconciliation, all within a single intelligent system.

AdIER takes a three-pronged approach to streamline distribution, designed to support every pillar of your distribution workflow.

## **Driver App, built for field efficiency.**

Empowers delivery personnel with their assigned routes, live schedules, coupon scanning, and on-the-go delivery note generation.

## **Manager App, designed for operational control.**

Enables supervisors to monitor ongoing deliveries, track asset movement, reconcile stock, and resolve issues in real time, regardless of their location.

## **Centralized Dashboard, built for strategic leadership.**

Provides complete visibility into the distribution network with deep, customizable insights into deliveries, inventory movement, asset utilization, and client activity.

Accessible across smartphones, tablets, and desktops, AdIER empowers every team to operate in sync, act faster, and scale confidently.

# AdIER redefines how you manage, track, and grow your business, *one delivery at a time.*
